This book offers a conceptual model for understanding the nature of legal competencies. The model is interpreted to assist mental health professionals in designing and performing assessments for legal competencies defined in criminal and civil law, and to guide research that will improve the practice of evaluations for legal competencies. A special feature is the book's evaluative review of specialized forensic assessment instruments for each of several legal competencies. Three-fourths of the 37 instruments reviewed in this second edition are new.

Excerpt of review from Book Reviews

By A Customer

"The first edition of this book was a classic, widely cited both for its analysis of forensic assessment instruments and for Grisso's integrative theory of forensic evaluation. With the second edition, Evaluating Competencies remains a classic. I expect that whenever a forensic psychologist or psychiatrist prepares for an advanced examination in this specialty, this book will-or should-be one of the first books reviewed."
