It is 1939 and, in an escalating climate of world war, an ocean liner is sunk in the Atlantic by what some of the survivors will believe was a German torpedo attack.

After the sinking and a storm at sea the story focuses on one group: three women, one boy and nine men. Those aboard lifeboat 7.

Though the situation of the varied group is precarious, they are at least lodged in a seaworthy craft, equipped with a goodly amount of rations, and have four ship's men as part of their number.

But those aboard the ill-fated lifeboat will gradually find that they have more than the elements and the limits of their stores, resilience and adaptability to imperil them.

For there is another, initially unseen, foe close by them which will prove their greatest threat. A sadistic, merciless and disturbingly aware life form that lurks in the pervasive element of the water. A devil in the deep blue sea.

It starts with an uncanny sea mist and a body drifting face down in the water...

Then, two of the boat's survivors disappear...

Soon the fearsome horror from the sea begins its campaign of terror and brutal butchery in earnest.

In sudden, horrific and bizarre attacks the attrition rate steadily rises as the devil claims its due, one by one, from the terrified, all but defenceless compliment of the boat.

Horror, madness, bloody violence and desperate acts of survival ensue.

The tormented passengers are privy only to the furthest black extremities of that which stalks and reaps them; swift, hideously strong tentacles that soon represent inescapable, inevitable pain and destruction to those on board.

Their unknown enemy is also perverse in the extreme, cruel and cunning. The dwindling group must pit themselves against a monstrous and unearthly torturer, that can even invade the very minds of those it threatens. Its glistening tentacles prove to be the merest tips of an ebon iceberg of terror.

Great first effort!

I'll admit, I bought this book because the cover really hit a nerve and there were no customer reviews at that time to sway me one way or another.

This book avoids a lot of the first time novel issues you see in ebooks. The editing was good, and the pacing was excellent. There was some slight inconsistency of narrative. At the beginning the language is very much of the pre-WWII era and the third person perspective waxes eloquent, but as the book continues the description and feel of the book becomes more modern.

\* updated 5/25/14 After sitting back and giving this book some thought, and this book will certainly stick in your head for a bit, I'll say that this change in narrative language actually works well and has some significance. The language serves as a bit of commentary on the arc of the story. At the end of the book, the language sweeps back toward the more grandiose style as the scene is enlarged beyond the claustrophobic confines of the lifeboat. I really think this works as the language is pared down along with the situation and characters, and is then restored for the climax.

The characters do tend to stay true to their era except for one goof where a character is looking at an empty sky with "not even an aircraft, a far off jet, not even the distant sun glint off the metal of one up there." Besides this minor point, that should have been caught by proof readers, the book really was excellent, especially for a first novel.

\* updated 5/25/14 I received a message from the author after posting this original review, in which he stated the aforementioned gaffe was brought to the publisher's attention and would be fixed in subsequent editions. This to me says a lot for the author, and the wonders of e-printing.

I assumed the story would be a high seas Lovecraftian tale of dread, in the vein of Tim Curran's Dead Sea, but, while the book has very horrific content, I was in for a surprise. The author gets right to the action after a brief scene setting, and character introduction. When expecting Lovecraft, I really thought the author's pacing was off as there wasn't a slow creeping build up of dread and unseen terror. Once I got rid of my expectations and caught on to actual storyline, I was hooked. There may not be a build up of dread, but there is certainly a descent into madness and despair.

I was vaguely reminded of Scott Smith's The Ruins in that there was a small group of people being whittled away by an intelligent and unconventional opponent, while also being stranded in a small area that was mistakenly assumed to be safe. The antagonist here though, is far more malevolent. The quarantine here is enforced by both nature and the unnatural. The calculated cruelty and black humor displayed by the tormentor are far greater than anything found in nature and could only be matched by those found in humanity.

Overall I thought this book was great. By the end I was staying up late and reading through my lunch hour as the story raced by. I look forward to more works by this author and I'll definitely recommend him to fellow horror readers.

The story is eerily egaging & at first, One is slowly lured in by an air of mystery and a love for maritime adventure but the author sets no limits on his extreme overuse of words describing each moment and character's actions. Aside from the abuse of the English languag, the story captivates enough to read on.
