Grade 5–7—An action-packed, tongue-in-cheek take on the world of superheroes and villains. Jackson Jones, 11, transitions from Mr. Popular to complete loser in the time it takes to be fitted for braces with headgear. He soon happens upon the underground headquarters of a group of outcasts called NERDS, who, with the help of technology "upgrades," turn weaknesses like allergies into superpowers, fighting crime in secret until the age of 18. While trying to escape, Jackson himself is accidentally upgraded—his braces become equipped with tiny nanobytes capable of morphing into any object. Asked to join the NERDS, Jackson quickly learns that not everyone wants him around—especially those he used to pick on. Unity must come quickly, however, to foil the evil Dr. Jigsaw, whose mission to reunite the continents of the world will lead to massive destruction. The absurd story line humorously hits on some oft-ignored topics—what is the difference between a goon, a henchman, a minion, and an assassin anyway? Readers will delight in these unexpected touches. The pacing is quick and the action is plentiful—kids will almost hear the sound effects as they read. The book itself is treated as a top-secret NERDS case file, complete with increasingly ridiculous security-clearance requirements (thumbprint, saliva sample, money). Angular, black-and-white illustrations highlight main characters and pivotal moments. NERDS brings a worthy message to the fore—that uncool kids can grow up to be anything but. Funny, clever, and thoroughly entertaining, this title should be popular.—Travis Jonker, Dorr Elementary School, MI

NERDS combines all the excitement of international espionage with all the awkwardness of elementary school, and the results are hilarious. A group of unpopular fifth graders run a spy network from inside their school. With the help of cutting-edge science, they transform their nerdy qualities into incredible abilities! Their enemies? An array of James Bond–style villains, each with an evil plan more diabolical and more ridiculous than the last. Publishers Weekly raved: “Buckley has a flair for exaggerated humor.” School Library Journal said: “Funny, clever, and thoroughly entertaining.”

Fun! Fun! Fun!

By NM Mom

Wow! This is the 1st book in a new series and all I can say is, "WOW!" My 8-year-old LOVES this book! He is a HUGE fan of realistic fiction and funny books. I have been struggling to find him books that meet these criteria. He loves the books about STINK (Judy Moody's brother), The Grosse Adventures, and the Boo books (About a secret agent), but they are not challenging reading for him anymore. He read one of the 39 Clues book, but they are not really funny. This book is perfect. There are between 1 and 3 words per page that he doesn't know, so he is learning new vocabulary and being challenged. And, it is funny! For example, one of the characters has 8 rows of teeth, 2 on top and 2 on the bottom. When he gets braces, they are highly magnetic and keep getting stuck to things. My son thinks this is hysterical! The story is "realistic" in that it is about a group of 5th graders who are nerds. Basically, this group of nerds is part of a CIA/FBI group that even the president doesn't know about. NERDS stands for National Espionage, Rescue, and Defense Society. Each kid has a special talent to contribute to solving mysteries. In this book, the problem is that Greenland has collided with Iceland (funny!) Presumably, in every book they will solve a different mystery or crack a different case. This book is probably for 4th - 6th graders, but as I said, I'm having trouble finding something for my 3rd grader. This fits the bill! He and I can't wait 'till the 2nd book comes out. I hope the author is a fast writer! We want to read as many of these as we can over the next 4 or so years! I highly recommend this book!

Update:

The 2nd N.E.R.D.S. book is due out September, 2010, See comment section of this review for link.

The 3rd N.E.R.D.S. book is due out September, 2011, See comment section of this review for link.

My son is now 10 and he is actively looking forward to the 3rd book!

This Book is Great !!!

By gift of wisdom

I cannot say enough about this book. My 10 year old son just loved it. He read it in three sittings, could not put it down! It is a funny adventure while also having challenging vocabulary words. Another plus, there are graphics in this book!! It is great for reluctant readers. To the author I say..." Thank You, Thank You !!!" It has been very difficult to find all around great books for kids in this age group. He can't wait until the next book. I agree with the previous poster...I hope the author is a fast writer!!! I can see this book soaring to the top of the charts!!

Creative and Fun. Well Worth a Read

By Mark Baker - Carstairs Considers

Jackson Jones has the run of Nathan Hale Elementary School. As the star quarter back of the football team, he can do no wrong. He and his friends rule the school. That is until Jackson has to get braces. As if his magnetic head gear weren't bad enough, no one will talk to him.

That's when Jackson learns that his school is the headquarters for a super secret spy program made up of

kids. Much to the other NERDS' dismay, he is asked to join their team. Can he get the hang of his new responsibilities in time to save the world?

This book may be aimed at kids, but I loved it. The obvious spoof references to James Bond and the spy genre in general will tickle adult's funny bones. Yet there is enough humor that the kids will get as well. While there is a lot that feels like set up for the rest of the series, it was all highly entertaining. I was never bored once while reading. Outside of Jackson, I never quite felt like the rest of the team stood out, although some of the other characters were memorable.

The book went by all too quickly, and I was sorry to finish it. I can hardly wait for the next adventure of the team.
