# SHAPE OF SOUND BY VICTORIA MEYERS PDF

For the past 20 years, Victoria Meyers, a Founding Partner of hanrahanMeyers architects, has crafted an architectural and urban design practice that includes sound as an intimate aspect of the designed environment.

Meyers analyses the shape of sound; architecture and sound; form; materiality; windows; the urban soundscape, its politics, aesthetics and social character; reflection; virtuality; sound art; and silence. This sequel to *Designing with Light* offers new theoretical insights into sound and the spatial experience accompanied by several key case studies. These include Meyers work with Stephen Vitiello, whose piece *A Bell For Every Minute* animated the New York High Line project, and her collaborations with composer and sound artist Michael Schumacher. *Digital Water i-Pavilion*, located opposite Ground Zero in Manhattan, has proved particularly innovative: Schumacher's score, developed especially for the building, has been etched into a glass facade which can be played by the public via an app; onlookers direct their mobile phones at the glass to read and hear the music.

Sound is not simply music however, and Meyers reflects upon this in her quest for an understanding of architecture as an auditory environment, through examples of buildings and materials which inspire and possess characteristic sonic properties.

## Most helpful customer reviews

1 of 1 people found the following review helpful.

Very Informative

By James Pittman

Shape of Sound is a perfect complement to Designing with Light. Shape of Sound is an exploration of the interaction between sound and the space it exists. Highly recommended!

0 of 0 people found the following review helpful.

brilliant!

By Aonam

thought provoking; complex; inspiring; progressive...brilliant! victoria meyers is not only a remarkable architect but a brilliant writer!
