Review

"This material is thorough and takes students into the 'real world' context of counseling that requires multitasking and an integration of relational, counseling, diagnostic, case management, and treatment planning skills!...It would be a text students could keep and find relevant in practicum, internship, and practice settings."

"I like this text for two reasons- - One reason is that it directly confronts the notion that professional helping is 'natural' or that anyone can be a good clinician based solely on intent. Second, it does re-cap most of the curriculum in a way that it could serve as a reminder for students as they begin their growth toward clinical autonomy."

Great perspective on counseling skills

By Brian Hazard

Being that I'm in my 4th year of a BA in Human Services, I've had to read quite a few texts on contemporary treatment approaches, ethical issues, and self-care while counseling. This book is a refreshing change from the norm in that it provides similar information but does so in a format that compares clinical, trained counseling to informal, natural "helpers" in order to highlight the vast difference between an untrained friend who considers themselves "a good listener" and a professional trained to help a client progress. I'm really enjoying it as a text book.

Did not come with DVD

By Pablo

This book did not come with the DVD meant for the book. It was replaced with a printer installation program instead by the previous owner, and the DVD was cracked.
