## Review

"Beau Keyte and Drew A. Locher have accomplished an ambitious task—one that can benefit anyone concerned with creating maximum value for customers with as little waste as possible. ... Beau and Drew expand the use of the now-proven Value Stream Mapping (VSM) tool to indirect, support operations, and services, locations and sources of so much waste. VSM as introduced by Beau and Drew seeks to enable users to see administrative and service waste, identify its sources, and develop a future state that eliminates it so that scarce resources can then be focused on those activities truly necessary to create value. You could find no two more experienced guides for this journey than the well-traveled Beau and Drew."

?From the Foreword by Dan Jones and John Shook

## About the Author

Beau Keyte is the founder of Branson, Inc., a management consulting company focused on the application of lean transformation strategies and techniques. Beau began his "lean" consulting career in the mid-80s at the Ford Motor company. He has clients in wide variety of industries such as automotive, healthcare, financial services, pharmaceutical, paper, chemical, refrigeration, distribution, and transportation. Beau has also successfully tied lean initiatives to the "bottom line" through the application of lean cost management techniques.

In addition to assisting companies in implementing lean strategies, Beau also trains organizations in a variety of public and private settings. He is currently a faculty member and instructor for the Lean curriculums at the Lean Enterprise Institute, the University of Michigan, Ohio State University, and the National Institute of Standards and Technology (NIST), where he has assisted in the development and implementation of a consistent training program for use within small- and medium-sized manufacturers. Beau has co-authored the

book, *The Complete Lean Enterprise: Value Stream Mapping for Office and Administrative Processes*, which received the Shingo Prize in 2005. Beau received a BSE and an MBA from the University of Michigan.

Drew Locher is currently Managing Director for Change Management Associates. CMA provides various Business Improvement Consulting and Organizational Development services to industrial and service organizations. CMA will assist organizations to successfully implement Systems and Quality Management principles within their operations to improve business performance. Since 1986, Drew has been working to implement innovative Business Management strategies in a wide spectrum of business environments. From 1986 to 1990 he worked to develop and deliver Business Improvement programs for General Electric. During this time, he had the opportunity to gain first hand experience in significant business improvement initiatives throughout a large industrial and service company. In 1990, Drew left GE to form CMA. CMA is a consortium of individuals who share a similar business management and improvement vision. They are committed to seeing innovative strategies implemented in all business environments. The CMA approach is practical and application oriented - a 'learn as you're doing and succeeding' approach.

In 1997, CMA partnered with the National Institute of Standards and Technologies', Manufacturing Extension Partnership, to develop a "Lean University". For more information, check out the NIST/MEP Lean Website. Since 2001, Drew has proudly been a faculty member of the Lean Enterprise Institute (LEI), the not-for-profit organization of the co-author of the landmark book "Lean Thinking", James P. Womack. LEI is committed to educating organizations worldwide in the concepts of Lean through its publications and workshops. He is also an adjunct faculty member at Ohio State University delivering Lean related workshops as part of the Fisher School of Business.

In 2004, Drew Locher co-authored book titled, "*The Complete Lean Enterprise - Value Stream Mapping for Office and Administrative Processes*". In April 2005, the book won the prestigious Shingo Prize for Excellence in Manufacturing. His new book (2008) is titled, "*Value Stream Mapping for Lean Development - a How-to Guide to Streamline Time to Market*". Drew received a Bachelor of Science degree from the University of Delaware in Mechanical Engineering, as well as a Master of Science degree from Drexel University in Electrical and Computer Engineering. He has also received a Master of Business Administration from Cornell University.

# **THE COMPLETE LEAN ENTERPRISE: VALUE STREAM MAPPING FOR OFFICE AND SERVICES, SECOND EDITION BY BEAU KEYTE, DREW A. LOCHER PDF**

The first edition of this book won a Shingo Prize for Excellence in Manufacturing Research, and now, following in the tradition of its bestselling predecessor, *The Complete Lean Enterprise: Value Stream Mapping for Office and Services, Second Edition* details a robust step-by-step approach for implementing Lean initiatives in the service industry and office environments.

A must-read for those looking to maximize the value they provide their customers, this new edition describes how to better align value stream improvements to strategic needs. In addition, it engages the entire organization in experimentation and connects a new management system with tiered visuals in support of leader standard work.

This updated edition of a Shingo Prize Winner:

- Features new critical steps in planning and preparing for VSM events
- Includes new content and examples from the service industry, including healthcare
- Provides a new examination of future state mapping
- Details methods for engaging an entire organization in continuous improvement by focusing on socialization
- Discusses the use of experiments to "learn your way" to a future state
- Provides examples of tiered visual management and demonstrates the principles of a lean management system

Providing improved ways to involve your organization in transformation and to sustain your efforts, the book expands beyond the "tools focus" to challenge your organization to think and act differently in order to change the culture of your organization as you become more effective and efficient.

This book details proven methods for aligning the organization for transformation, creating future state visions of improved effectiveness and efficiency, and engaging all levels of the organization in the transformation. After reading it, you will be better prepared to transform your organization to one that not only sustains improvement gains but is more adaptable to shifts in market and customer needs.

Highly Recommended

By Adam C. Shank, JD, MBOE

I highly recommend this work for anyone looking to improve the work they do in service or information industries. As corporate counsel for an education management organization, I do a good deal of work with school districts as well as legal departments. I have yet to see one that wouldn't benefit from The Complete Lean Enterprise. For non-traditional environments such as legal departments and school districts looking to benefit from proven lean practices, this book should be mandatory reading.

Thanks, Beau and Drew for another gem

By Amazon Customer

I was taught how to do value stream mapping by Beau and Drew and have continued to learn from them through their workshops and blogs. They are both committed to improving this valuable tool, and this book summarizes many of their recent upgrades. I recently had a couple of opportunities to try out the "chunking down" technique described in Chapter 7 and found it to be a real breakthrough. I also think that all managers should read the section in Chapter 10 about the "humble inquiry" approach to management. This book is full of similar nuggets that you can use right away.

Very useful book

By Brian Ponstein

This book was a book required for me to read for a class. However it has proven to be a book that I can easily reference later. The layout of the book has been done well and there is useful info on every page. This it isn't full of that bla bla bla and is probably why it is a short book.
