Great little short story

By Robert Waterman

I was fortunate to get an advanced copy of this book and I can say that it is a great read and it reads more like a novel yet it is still punchy. This book along with its predecessor, My name is Lydia, have in my opinion been a lot darker making them more horrific and adding to the tension. I thoroughly recommend this book.

A pot-boiler...

By FictionFan

An elderly man with dementia leaves his home in the middle of the night wearing only his pyjamas. His body is found the next day, 7 miles away, smashed and mangled on the tracks of a long-disused railway line. The police are baffled, so his daughter asks for help from private investigator Jack Nightingale.

Apparently Jack Nightingale has appeared in several books and stories before this one, but this works fine as a standalone. He appears to get his cases via a mysterious Mrs Steadman who contacts him on the astral plane. He is British but in this story is working in America. The mysterious death has happened in a town in Utah, bordering the Navajo Nation territories. So it's not a huge surprise that the supernatural occurrences come courtesy of medicine men, cursed wampum, evil spirits, etc., (though perhaps a little surprising that a Native American spirit should be impersonating a train...)

I'm afraid this is a bit of a pot-boiler - I'd reckon roughly zero effort went into it. The whole Native American bit reads like a Brit who knows nothing so just throws out a few clichés he's picked up from old pulp fiction or cowboy films. The fear factor is non-existent, largely because there's no attempt at creating atmosphere. The writing is workmanlike, though one can't help but feel a quick read-through before pressing 'Publish'

would have enabled him to eliminate the worst of the errors - such as describing the dress and hairstyle of a character twice, differently, in the same scene. It left me baffled as to how the medicine man's two pigtailed had turned into one ponytail - not to mention a complete change of clothing - and even more baffled as to why no-one had noticed this miraculous transformation happening! That was really the only truly spooky part, I'm afraid...

Jack in Utah

By James Tepper

TRACKS, a short story, is the first Jack Nightingale appearance since the climactic ending of the 6th novel in the "main" Jack Nightingale series. It is therefore, the first of a couple of novels (so far) that take place in the US rather than in the UK. One need not have any read any of the preceding novels to appreciate Jack or his sense of humor, but if you have read some of the early novels, you may be puzzled as to how Jack comes to be in the US.. If you want to know, read the novel LASTNIGHT.

Anyway, Jack finds himself in Utah on a mission to help a friend of Mrs. Steadman, his ace-in-the-hole for all things supernatural. Annette Carson's father who suffered from Alzheimer's Disease is found dead out in the middle of the desert in a place the locals call "The Tracks" because 50 years ago the railway ran though there and there are still a few pieces of the track remaining. Carson senior was found with nearly every bone in his body broken with no explanation. These are the sorts of cases that Jack excels at, and before long, there are other deaths and Jack is very much a fish out of water trying to figure out what is going on.

With the exception of Mrs.Steadman, there are none of the usual supporting cast because Jack is now in the US, and I miss them. But Leather's usual wit and pacing are in fine form as Jack investigates and, naturally, finds the answer. This one is a little different from most of the Jack novels and shorts (nary a demon in sight) but there's more than one way to get supernatural.

Recommended.
